From The President

Well the last of the Coffee and Donuts at Bergstrom's dealership is done and gone till next year. Thanks to Nick Proctor for hosting these events, and to Bergstrom for allowing us to hold these events at their dealership this year and look forward to having them continue next year.

September 14th Roy and Darlene Geigel held their 2nd annual car show at their farm in Manitowoc. I was able to attend their show last year, but unable to make it this year. From what I hear it was just as successful as last year. Roy and Darlene, thanks so much for opening up your home for the club and hosting this event.

September 20th was our clubs famous Fall Tour, hosted by Bob and Carol Burress and Greg and Mary Rigoni. This year's tour took us to Minocqua, WI. Starting from Green Bay the caravan was arranged by Tom and Margie Zoromski. Thanks guys for putting this huge event together and making it as good as our past Fall Tours. If you were not able to make it, you missed a very memorable and fun time.

August 24th marks the date that I made another life changing experience. I negotiated and decided to purchase my third Porsche, a 1985 1/2 944. I still am not sure if it was the right decision or if I am just crazy. But I know I can justify my purchase in many different ways and that makes it alright. I think. It was a real bargain and I needed a Porsche for the upcoming Fall Tour as I realized that my 356 would not be done and my 930 really should not be driven until I get the rings repaired, so that left me with no choice but to get another Porsche to hold me over. So that's how it all started, I finalized my purchase on August 24th and worked most evenings and weekends until September 19th, the day before the Fall Tour on this bargain Porsche to have it road worthy for the event. I'm sure you have heard it before, but my bargain wasn't such a deal after all, By the time I got all the parts and repairs done, I had much more time and money into it than I expected. It did turn out very nice and it is a very solid car, so I feel that I should be able to enjoy many miles of trouble free driving with it and it is a real benefit to not have to stop at every darn gas station to fill up. So in that aspect the 944 is saving me money. Plus now I have a Porsche from the sixties the seventies and now the eighties, somehow I think in a year or two I will need one from the nineties. On top of all that the car is black and after a couple of weeks of hard buffing and waxing, the original paint really shines. Debbie seems to like the car too, she likes black cars, I do too when they are clean, but it is hard to keep them clean and looking good. Anyway I am convinced that I made the right decision and that this was a good purchase. I think.

Be sure to check October's schedule of events, a very busy month and many new and different events to pick from. Hope to see you at some of these.

Proud to Be Your
President,

Gordon Skog

Nominations for 2014 Board of Directors

It's that time of year again when we ask for any interested members to step out of the shadows and throw their hat in the ring for next years Board of Directors.

Are you tired of hearing from the same secretary for the past thirteen or fourteen years? Would you like to hone your skills in leading a club? (It looks good on your resume.) Do you have ideas of how we can improve as a club? Would you be interested in adding some new blood to the club? We'd love to have you on board. All current board members are willing to help with the transition.

You've heard the saying that it takes a village to raise a child. The same applies to the club. New and fresh ideas make us the great group we are. Please let any board member know of your interest by the end of October so ballots can go out in early November.

Mary Haen
Secretary

It's that time of year again, for the annual Fall Tech Session at the Auto Clinic!

This year's fall tech session will include a special presentation and demonstration by Dr. Vladimir Chernin, research scientist for Cleaning Systems, Inc. located in DePere, WI. www.cleaningsystemsinc.com Those of you that attended the spring opener at Jim & Linda's heard a short presentation about Break Dust Repellant (advertised monthly in Panorama) and received a free sample. As a follow up, Dr. Chernin will discuss the development of the product and present a live demonstration. A follow-up question and answer session will follow. October 19, 2013: FVR's 1st Dyno Day!

Based on a suggestion from a club member, the FVR will have a Dyno Day at Beyond Redline, 1220 Winford Avenue, Green Bay. <http://www.beyondredline.com> (Directions- From I-43, take exit #189 to Atkinson Avenue, turn right onto Velp Avenue, then right onto Winford Avenue.)

Beyond Redline is offering a Dyno experience like no other. To better their customer's experience, they have just installed a new, top of the line, Dyno Jet 424XLC wheel drive dyno. The dyno is equipped with the Eddy Current braking system for steady state load testing available upon request. Customers are able to sit in a climate controlled showroom in comfortable seating, or overlook the vehicle on the dyno through the viewing window. In addition, customers can watch engine performance via their computer monitor live from the comfort and safety of the show room.

Rate is \$85 for three pulls and computer assessment which includes a graphed print out of horsepower, torque, air/fuel reading, and boost (if applicable). Call Beyond Redline directly at 920-498-1223 or 1-888-498-1223 and ask for Steve Pahl to make your appointment, beginning with 9:00 AM. Each assessment takes about 20-30 minutes. Beyond Redline is usually not open on Saturday's, so they are doing this as a special for us. If 10+ cars reserve and participate, the rate will be \$75 per car. Please note: these rates are for 2WD cars. 4WD are \$110. Some newer vehicles may not be able to get a torque reading because an ignition signal is needed and is extremely hard to get.

What is a dyno and why should I consider doing it?

The basic function of a dynamometer test is to measure the amount of horsepower and torque a motor or engine produces. For most automotive manufacturers, before an engine is ever installed in a car, the automaker's engineers will hook it up to a dyno to measure the horsepower and torque. The highest numbers produced as the engine revs to its redline will be noted and listed in the specifications under maximum horsepower and torque. Porsche sets their horsepower requirements and then engines must meet that value. However, an engine could also exceed that number before it is installed. The horsepower listed is a minimum output. For example, if the specs for your car state it has 250 horsepower, it's possible the actual number is higher. This differs from other car manufacturers in that the horsepower listed in the specs is the average maximum.

When running a chassis dyno test, the vehicle to be tested is driven onto the dyno platform that simulates resistance through the use of automated wheels. Using a dyno to test the power of the engine can be very valuable when tuning engine performance and can also help achieve as close to 100% fuel and power efficiency as possible. A relatively minor modification such as turning off the air conditioner or modifying the air intake can affect the engine of a car, so many people looking to make their cars more powerful want to test them with a dyno to quantify the results of the changes. Other reasons include measuring the engine of an older vehicle or one that has been recently repaired or modified to compare with the results from the automaker. For others, it is just bragging rights.

HELLO MY NAME IS

If you have been to a club event, undoubtedly you have seen others at the meeting with the attractive and classy engraved wood name tag, which is a great alternative to the press-n-peel name tag.

Now, you will no longer need to be embarrassed when you forget to take it off and go somewhere else afterwards - this FVR logo name tag rocks!

Larry Rogers has the solution for you! Our region has very attractive and professional name badges that are laser-engraved with our region's name, and

most importantly, your name for about \$12 each. You can order either a pin-on style or magnetic style. Please contact Larry at fvrpca@sbcglobal.net to order yours now. You can have it in time for our upcoming events.

The Learning Curve

Although the fall season raucously proclaims its presence by the notable decrease of daylight hours each day, there is also the unmistakable and magnificent evidence presented by the incredible display of fall colors. This year's late September FVR Fall Tour in Northern Wisconsin gave us an opportunity to view a hint of what was to come, as the daily changes colored the landscape in a manner far more stunning than even a master artist could hope to duplicate on canvas. The roads chosen by our tour organizers, Bob and Carol Burrell, were splendid examples of the tranquil beauty of the northwoods and served as reminder to self: plan to spend more time enjoying this region we call "up north."

Bob and Carol, along with their co-hosts Greg and Mary Rigoni have a well-deserved "thank you" coming for their efforts in planning and delivering a great experience for this year's tour participants. Bob and Carol's generous donation of the Porsche luggage which was raffled off during the Saturday night banquet, in addition to their donation of several silent auction items fetched a \$1,225 donation to the American Cancer Society. Well Done!

As we look forward to the future club events, the calendar is full of great plans, so please do be sure to make time in your schedule to attend an event and join in on the fun!

Please send all information (writings and pictures) as an attachment in your email, do not let silly concerns about spelling, grammar or the like prevent you from sharing your story about your favorite Porsche or your extended family of Porsche friends - but please do include the name of event, captions for photos, and the names of people in photos. And don't forget to include the name of who took the picture - photo credits are a big deal in the world of highbrow Moto-journalism.
